VG ProPac

MOIN, WE ARE HIRING INTERNS

WANTED

PACKAGING ENGINEERING INTERNSHIP AT VG ProPac

Ready to turn your studies into real-world impact? Join our team for a three- to six-month mandatory internship and help create innovative packaging solutions for leading brands.

WHO WE ARE

At **VG ProPac**, we believe great packaging does more than protect a product. It tells stories, creates experiences, and drives purchasing decisions.

We help our customers overcome packaging challenges through a unique combination of **strategy, design, consulting, and realization.**

Our team in Hamburg brings together packaging engineers, creative designers, and industry experts who are passionate about turning ideas into successful packaging solutions.

We are part of the Van Genechten Group, and as an international network of packaging specialists, we combine local expertise with global perspectives, enabling us to support projects across markets and industries.

From the first brainstorming session to the finished product on the shelf, we develop packaging with impact.

YOUR IMPACT

- Develop and refine creative packaging concepts
- Create prototypes and support packaging tests
- Explore sustainable materials, technologies, and trends
- Contribute to real client projects, workshops, and presentations

WHAT YOU BRING

- Bachelor's or master's studies in packaging technology, mechanical engineering, product development, industrial engineering, or a related field
- A mandatory internship as part of your degree programme
- Curiosity, initiative, creativity, and an analytical mindset
- Good English and German skills

WHAT WE OFFER

- Hands-on experience and personal mentoring
- Real projects for leading brands in an international network
- €700 monthly internship allowance
- Deutschlandticket
- Support in finding accommodation in Hamburg
